ATTORNEYS FOR DEFENDANTS BOBBY A. ALI; RICK ALI¹;
M1 COLLISION CARE CENTERS, INC.²; AUTOVEST
COLLISION REPAIRS, INC., DBA AUTOWEST COLLISION³
REPAIRS, INC.; AND AW COLLISION OF SERRAMONTE³

UNITED STATES DISTRICT COURT

NORTHERN DISTRICT OF CALIFORNIA

SAN FRANCISCO DIVISION

RAFAEL SANDOVAL, LUIS MARTIN CALIXTO, and ADRIAN RAMIREZ on behalf of themselves, on behalf of all others similarly situated and in the interest of the general public,

Plaintiffs,

V.

BOBBY A. ALI; RICK ALI, M1 AUTO COLLISIONS CENTERS, INC.; M1 COLLISION CARE CENTERS, INC.; AUTOVEST COLLISION REPAIRS, INC. aka AUTOWEST COLLISION REPAIRS, INC.; and SERRAMONTE AUTO PLAZA BODY SHOP, INC.,

Defendants.

CASE NO. CV 13-03230 EDL

**DEFENDANTS' OPPOSITION TO
PLAINTIFFS' MOTION FOR CLASS
CERTIFICATION AND APPOINTMENT
OF CLASS COUNSEL**

Date: July 21, 2015

Time: 9:00 a.m.

Dept.: Courtroom E, 15th Floor
450 Golden Gate Avenue
San Francisco, CA 94102

Judge: Hon. Elizabeth D. Laporte

¹ Defendants Bobby Ali and Rick Ali were dismissed with prejudice from this action by the Court's Order of 7/10/2014.

² Erroneously sued as "M1 Auto Collisions Centers, Inc."

³ Erroneously sued as "Serramonte Auto Plaza Body Shop, Inc."

CASE NO. CV 13-03230 EDL

DEFENDANTS' OPPOSITION TO PLAINTIFFS' MOTION FOR CLASS CERTIFICATION AND APPOINTMENT OF CLASS COUNSEL

TABLE OF CONTENTS

2	I.	SUMMARY OF ARGUMENT.....	1
3	II.	FACTUAL BACKGROUND.	1
4	A.	Defendants Are All Entities in Good Standing.....	1
5	B.	Defendants Had Lawful Piece Rate and Rest Break Policies.	2
6	C.	Defendants Properly Tracked Employees' Working Hours.....	4
7	D.	Employees PAID for Each Hour Worked At Their Hourly Rate.....	5
8	III.	PROCEDURAL BACKGROUND.....	5
9	A.	The 2008 State Court ("Juarez") Action.....	5
10	1.	Plaintiffs Lost At Trial On All Individual and PAGA Claims.	6
11	B.	INSTANT LAWSUIT.....	6
12	IV.	PLAINTIFFS' CLAIMS ARE BARRED BY RES JUDICATA AND STATUTE OF LIMITATIONS.....	7
13	A.	Plaintiffs Seek to Certify a Class Outside the statute.	7
14	1.	The Instant Action is Nothing More than Forum-Shopping.....	7
15	2.	The Statute of Limitations was Not Tolled by <i>Juarez</i>	7
16	B.	Proposed "Class No. 3" Over-Reaches to Include Employees from Sunnyvale and Fremont.....	9
17	V.	CLASS CERTIFICATION SHOULD BE DENIED UNDER RULE 23.	9
18	A.	Plaintiffs Do Not Have the Required Numerosity to Certify a Class for its Opt-In FLSA Claim.	9
19	B.	Plaintiffs Cannot Show Commonality.	10
20	1.	There is No Commonality on the Rest Break Claim.....	11
21	2.	No Commonality on "Waiting" or "Administrative" Time Claims.	14
22	3.	The Alleged Rest Break Violations Do Not Meet Commonality Standard.....	22
23	4.	The Claim for Inaccurate Wage Statements Requires Individual Inquiry as to Specific Injuries.	23
24	C.	Plaintiffs Have Not Shown the Typicality Required for Class Certification.....	24
25	1.	Body Men Were Paid Differently Than Paint Team Members.	24

1	2. Variations Exist in Application of Piece Rate System.....	25
2	3. Different Paint Teams Were Compensated Differently.....	25
3	4. Not All Putative Class Members were Piece Rate Workers for the Entire Class Period.....	25
4	5. The Detail “Deduction” Was Not A Policy Across The Putative Class.....	26
5	6. The Uniform Deduction Did Not Affect All Putative Class Members.....	26
6	D. PLAINTIFFS’ COUNSEL DO NOT ADEQUATELY REPRESENT THE CLASS.....	26
7		
8	VI. THIS CASE CANNOT BE CERTIFIED AS A CLASS UNDER RULE 23(B)(2).....	27
9		
10	A. Individual Issues Predominate All of Plaintiffs’ Claims.....	27
11	B. Plaintiffs’ Reliance On Improper Sampling Demonstrates that A Class Action is Not the Superior Method for Adjudicating this Claim.....	27
12		
13	1. Sampling Is Not Appropriate, and the Inadmissible Attorney Declarations Offer No Proposal for Management of the Class Action.....	28
14		
15	2. Plaintiffs Make No Proposals about Managing the Numerous Issues.....	29
16		
17	VII. THIS CLAIM IS NOT APPROPRIATE FOR FLSA §216(B) CONDITIONAL CERTIFICATION.....	30
18		
19	A. Regardless of the Standard, Plaintiff Has Not Shown Sufficient Evidence to Establish that there are Other Employees Who Desire to Join The Lawsuit.....	30
20	B. Plaintiffs Have Not Shown that they are “Similarly Situated” to Other Putative Class Members.....	31
21	C. a Collective Action Would Not Increase Judicial Efficiency.....	31
22		
23	VIII. CONCLUSION.....	31

TABLE OF ISSUES FOR CLASS CERTIFICATION

1. Are Plaintiffs' claims barred by res judicata or collateral estoppel?
2. Does the proposed Autovest (Autowest) class period exceed the statute of limitations?
3. Do Plaintiffs satisfy the Rule 23(a)(1) numerosity requirement on their Opt-In FLSA Claim?
4. Do Plaintiffs satisfy the Rule 23(a)(2) commonality requirement on their claims?
 - a. Can there be common proof on whether the piece rate system compensated for administrative time when there is no way for employer or employees to track administrative time?
 - b. Can there be common proof on whether the piece rate system compensated for waiting time when there is no evidence or record of waiting time?
 - c. Can there be common proof on whether the piece rate system compensated for rest breaks when the experiences of workers as to breaks varied greatly?
 - d. Can there be common proof on the question of whether each class member has suffered injury as a result of inaccurate wage statements?
5. Do Plaintiffs satisfy the Rule 23(a)(3) typicality requirement on their claims?
 - a. Are the Plaintiffs' claims regarding overtime typical of a proposed class consisting of body men, painters, preppers, and polishers who were all paid differently?
 - b. Are the Plaintiffs' claims regarding overtime typical of a proposed class wherein not everyone was paid piece rate for the entire class period?
 - c. Are the Plaintiffs' claims regarding detail deduction typical of the proposed class when not all class members experienced the deduction?
 - d. Are the Plaintiffs' claims regarding uniform deduction typical of the proposed class when not all class members wore uniforms?
6. Do Plaintiffs satisfy the Rule 23(a)(4) requirement of adequacy of representation?
 - a. How can Plaintiffs' counsel avoid their conflict of interest?
7. Do Plaintiffs satisfy the Rule 23(b)(3) requirements?
 - a. How can common questions of law predominate when the proposed classes

1 consist of individuals who were paid differently, and were not under the piece rate system for
2 the entire class period?

3 b. Is class action the superior method of adjudicating this case where Plaintiffs
4 rely on improper sampling and have proposed no method for managing the individual issues
5 that abound?

1 **I. SUMMARY OF ARGUMENT.**

2 Plaintiffs, ignoring the res judicata effect of the *Juarez* Judgment in favor of Defendants, move
 3 for class certification on the same evidence and testimony that they relied upon in the *Juarez* state law
 4 action. The theory is identical: despite a policy requiring the use of a time clock to report hours, they
 5 did not follow the policy, did not record all hours worked, and now seek additional unquantified
 6 compensation. Further, Plaintiffs seek additional compensation for “administrative” work and waiting
 7 between jobs. There is no definition of “administrative” work and all employees agreed that when they
 8 went to trainings they were paid their hourly flag rate. Additionally, employees’ waiting time varied
 9 widely, with many stating they were always busy and could only recall a few instances of waiting.
 10 While a few employees claim they had to wait for work, they were the exception, not the norm. The
 11 evidence confirms that no common method of proof exists for the off-the-clock, untracked, or
 12 unreported “administrative” or waiting time.

13 Plaintiffs proposed “research model” does not solve the individual inquiry problem. While the
 14 Supreme Court made clear that samplings are not appropriate in class actions, the model is also flawed
 15 because it is not defined, fails to account for variances between the three body shops, including the
 16 differences in how painters, preppers and bodymen were paid, or that some employees switched from
 17 hourly to piece rate and back again.

18 Plaintiffs have failed to demonstrate the requisites for either a class action or a collective
 19 action. Certification should be denied.

20 **II. FACTUAL BACKGROUND.**

21 Plaintiffs and Opt-In Plaintiffs (collectively “Plaintiffs”) have sued three entities that are all
 22 autobody repair centers and have a related owner, yet, the evidence demonstrates each was managed
 23 and operated in different ways.

24 A. **Defendants Are All Entities In Good Standing.**

25 Autovest Collision Repairs, Inc. was formed in 1996, operated as Autowest and became
 26 AW Collision, Inc. in 2013. It is an auto body collision repair facility currently operating in San Jose.
 27 M1 Collision Care Centers, Inc. is a California corporation which previously did business as Fremont
 28

1 Collision Care Centers (sold), Concord Collision Care Centers, and Sunnyvale Collision Care Centers
 2 (closed/assets sold). Today, Concord Collision Care Center is known as AW Collision, Inc. dba AW
 3 Collision of Concord. Serramonte Auto Plaza Body Shop, Inc. became a dba of AW Collision NC1
 4 and is lawfully registered as the same. RJN, Exhibits R-U. While Plaintiffs seek to represent a class of
 5 employees who worked at Sunnyvale Collision Care Center and Fremont Collision Care Center, none
 6 of the plaintiffs were ever employed by those entities⁴.

7 B. Defendants Had Lawful Piece Rate And Rest Break Policies.

8 Plaintiffs acknowledge Defendants had a lawful policy of providing rest breaks.
 9 However, they argue that the hourly piece rate system failed to compensate piece rate workers
 10 (including body men, painters, preppers, and polishers) for their rest breaks, overtime and
 11 “administrative” time spent on non-repair tasks. Cert. Mot. at p. 7:7-8, 8:18-9:8; 18:22-26. Defendants
 12 did not require uncompensated administrative work, and its pay method properly compensated
 13 employees for all hours worked.

14 Plaintiffs confirmed that between the years of 2005-2008 they were paid on a “piece rate”
 15 system authorized by the DLSE. RJN, M DLSE Manual § 2.2. The piece rate system was not created
 16 by Defendants; it is commonly used in the auto body repair industry. Certain Plaintiffs are paid
 17 similarly at their current employers. Long Dec., Ex. 4 (Calixto at 9:19-10:20).

18 The piece rate system utilized at each Defendant entity is measured and paid in flag hours, not
 19 by the true “piece” (i.e., payment for each fender, bumper or headlight completed). Defendants utilize
 20 two software systems to estimate repairs. Generally, the software populates the hours associated with
 21 each repair; however, some items require the independent judgment of the estimator. Dec. of Alex
 22 Astts , ¶11. The software companies use time studies to determine how long it takes the average
 23 employee to perform a repair, including time for breaks, getting tools, looking up orders, gathering
 24 parts, and cleaning up after the repair. Dec. of Astts, ¶ 10, Ex. 25 (Wayne Krause Dec., ¶ 4-5); Ex.27
 25 (Krause Juarez Tes. at 1812:13-1813:4).

26

27

⁴Calixto claims he worked for one week at Sunnyvale on loan from Autowest and confirms he was an Autowest employee and that Autowest paid him. Long Decl., Ex.23 (Calixto Juarez Dec.), ¶ 13.

1 In this case, employees have confirmed that if the hours assigned to a repair were not sufficient,
 2 they could ask for more.⁵ The work is not assigned until the repair is authorized and the parts ordered.
 3 The work order dictates how many hours the employee will be paid for the car no matter how quickly
 4 he repairs the car. Long Dec., Exs. 4 (Calixto at 29:2-8), 10 (Lopez Sr. at 23:20-23). The Plaintiffs
 5 have all consistently testified that they completed repairs in less time than the hours allotted. Long
 6 Dec., Ex. 6 (Sandoval at 77:19-22, 79:9-80:8), 10 (Lopez Sr. at 16:24-17:2). Each confirmed he was
 7 always paid for all hours reflected in the work order. Long Dec., Exs. 6 (Sandoval at 82:8-83:13, Exs.
 8 1, 6-7), 8 (Flores at 40:19-41:22), 10 (Lopez, Sr. at 59:25-60:10), 9 (Llamas at 20:19-21:12), 12
 9 (Sifuentes at 60:9-13), and 4 (Calixto at 49:17-22).

10 The employees (painters and bodymen) confirmed they were given a summary of their piece
 11 rate hours weekly to confirm its accuracy. Long Dec., Exs. 8 (Flores at 92:22-93:11, Ex. 11), 10
 12 (Lopez, Sr. at 59:4-7, 39:20-24, Ex. 13), 9 (Llamas at 32:2-33:1, Exs. 16-17), 6 (Sandoval at 80:12-
 13 83:13, Exs. 6-7), 4 (Calixto at 71:5-74:7, Exs. 28-29), 11 (Lopez Jr. at 30:15-19); Avendano Dec., ¶21-
 14 22; Bioc Dec., ¶22-23; Davila Dec., ¶26-27; Fuentes Dec., ¶17-18; Gomes Dec., ¶24-25; Gutierrez
 15 Dec., ¶24-25; Hernandez Dec., ¶17-18; Mata Dec., ¶19-20; Mendieta Dec., ¶20-21; Prado Dec., ¶23-
 16 24; Soto Dec., ¶25-26.

17 Each body man was paid the total number of flag hours he completed in a week multiplied by
 18 an hourly flag rate (usually between \$19-\$22/hour). By contrast, painters, preparers and polishers, also
 19 piece-rate employees, were paid differently – on what was called the “Pie System” whereby they split
 20 hours based on teams. (DLSE Manual § 2.5.3) The total flag rate hours completed by the entire team
 21 for the week were compiled and multiplied by the painter’s flag rate which was then split, according to
 22 percentages decided by the painter, among the various team members. Long Dec., Ex. 24 (Rich
 23 Albright Dec. ¶4). At some shops, the paint team consists of painters, 1-2 preppers, and a polisher,
 24 each of whom participates in the split. Bioc Dec. ¶9; Davila Dec. ¶8. In other situations, the polisher
 25 is not paid a split of the flag hours – only the painter and the prepper(s). In those situations, the polisher
 26 is paid on an hourly basis. Soto Dec. ¶8. In a third set of circumstances, sometimes the painter is paid

27 ⁵ Astts Dec. ¶ 12; Avendano Dec. ¶ 11; Bioc Dec. ¶3-4, 10; Davila Dec. ¶16; Fuentes Dec. ¶3; Damasceno Dec. ¶3, 9-
 28 10; Gutierrez Dec. ¶9; Hernandez Dec. ¶3, 9; Robles Dec. ¶3, 9; Mendieta Dec. ¶3, 11; Prado Dec. ¶4, 9; Soto Dec. ¶3, 12.

1 on the flag rate basis but the preparers are paid on an hourly basis. Avendano Dec. ¶8. Plaintiffs'
 2 motion fails to address these nuances.

3 C. Defendants Properly Tracked Employees' Working Hours.

4 Each defendant entity required all piece rate workers to use a time clock. Doc. #75-2
 5 (4/18/15) at p. 111 (Palau Dec.); Astts Dec. ¶ 16-17; Bioc Dec. ¶20; Davila Dec. ¶24; Gutierrez Dec.
 6 ¶20; Avendano Dec. ¶20; Gomes Dec. ¶19; Hernandez Dec. ¶14; Mata Dec. ¶16; Soto Dec. ¶21;
 7 Fuentes Dec. ¶14; Mendieta Dec. ¶16; Prado Dec. ¶20. Workers were required to clock in at the
 8 beginning of their shift regardless of whether cars were immediately available for repair. The total
 9 hours they were present at the shop, working or not ("clock hours"), were tracked on a weekly basis.

10 Plaintiffs assert that the computers were always broken or they did not use the time clock, yet
 11 time records exist for each. They were asked to sign and review weekly reports, some electronic and
 12 some handwritten. Long Dec., Exs. 2, 4(Calixto Ex. 28-29); Dec. of Astts Ex2A-2H. Once confronted
 13 with the evidence, Plaintiffs asserted they were asked to certify that they worked only 8 hours a day 5
 14 days a week even if that was untrue. However, upon questioning, they admitted there was no such
 15 requirement. Dec. of Astts, Ex2A-2H. For example, Manual Llamas admitted that he sometimes
 16 worked 9 hours and that the time clock record he signed demonstrated a 9 hour work day for those
 17 days he worked over 8 hours. Long Dec., Ex. 2A-H, 9 (Llamas p. 30:15-31:22, Ex. 19).

18 Further, the declarations designed to corroborate the off-the-clock unreported overtime claims
 19 are misleading. For example, Francisco Lopez declared that he would come in early on Mondays and
 20 work until 8 or 9 p.m., yet at deposition he revealed that he would leave to take his son home around 5
 21 p.m. and then, if needed, would return later to work because he had a key. Further, he testified that in
 22 2010 all employees' keys to the shop were taken away and he could not work before the shop was
 23 open, around 7:30–8 a.m. Long Dec., Ex. 2d, 10 (Lopez, Sr. at 64:10-21; 74:11-25⁶).

24
 25
 26 ⁶ Defendants object to the declarations of Sandoval, ¶¶6, 7, 9, 10; Calixto, ¶¶10, 19, 21; Ramirez, ¶¶7, 8; Flores, ¶7;
 27 Llamas, ¶¶9, 10, 11, 12, 15 Lopez Jr. ¶¶5, 8, 11; and Lopez Sr. ¶¶11, 14, 17, 19 on the grounds that each is inconsistent
 28 with testimony given at deposition and is vague and conclusory in violation of FRE 801(d)(1)(A) and 403. See Long
 Dec. Ex. 28, for a detailed summary of the inconsistencies rendering the declarations inadmissible.

1 D. Employees Paid For Each Hour Worked At Their Hourly Rate.

2 While it is true that Defendant entities paid employees on a piece rate, the pay system
 3 ensured employees were paid for each hour worked at their hourly rate of pay. Defendants also ensured
 4 piece rate workers were paid at an hourly rate of twice the minimum wage to comply with California's
 5 requirement for workers who provide their own tools. Long Dec., Exs. 18 (Nguyen 2015 at 72:13-
 6 73:8; 76:16-20, 78:22-79:25), Ex. 19 (Nguyen Trial 84:27-85:14, 86:26-87:8); Astts Dec. ¶23-24.

7 The accounting staff would review the hours each week and determine if the workers were paid
 8 for each hour worked at his hourly rate of pay. Ms. Nguyen previously gave an example of Luis Martin
 9 Calixto for week ending March 28, 2008, when he worked 51.5 hours. Long Dec. Ex. 27, (Nguyen
 10 Dec.) ¶ 32. Ms. Nguyen confirmed that defendants determined that he was owed \$1,259.50 for hours
 11 worked, and he was in paid \$1,540.00 under the piece rate system, demonstrating that his
 12 compensation was greater than what was required. *Id.*

13 Employees confirmed they were paid for all of the flag hours shown on the work orders. The
 14 record also demonstrates that each week employees were paid far more than their actual shop hours.
 15 Francisco Lopez indicated that generally a skilled body man can do the work in 60% of the time
 16 allotted. Long Dec. Ex. 10 (Lopez, Sr. at 35:8-24). So while it is true that Plaintiffs worked overtime,
 17 Defendants ensured they were paid for it.

18 Further, the evidence demonstrates that if the employee had fewer flag hours than hours
 19 worked, they were paid the difference. (Long Dec. Ex. 19 (Nguyen Trial Tes. at 11:26-12:25, 28:12-
 20 22, 103:2-5, 114:4-10, Exs. 216 and 226); Bioc Dec. ¶25; Soto Dec. ¶23), however, most employees
 21 confirmed their piece rate was always greater than the hours worked. Gomes Dec. ¶21, 25; Fuentes
 22 Dec. ¶20; Gutierrez Dec. ¶; Hernandez Dec. ¶20; Mendieta Dec. ¶22.

23 **III. PROCEDURAL BACKGROUND.**24 A. The 2008 State Court ("Juarez") Action.

25 On September 4, 2008, Mallison & Martinez and Tomas Margain, the same attorneys
 26 who represent Plaintiffs here, filed an identical purported class action lawsuit against all of the
 27 Defendants stated herein and MB Bodyshop of San Francisco, Inc. in the Superior Court of California,
 28

1 County of Santa Clara, entitled *Juarez v. Ali et al.*, Case No. 1-08-CV-121859 (“*Juarez*”). See Request
 2 for Judicial Notice (“RJN”) Ex. A and Motion to Dismiss filed concurrently herewith. The Superior
 3 Court entered its Order Denying Class Certification on April 23, 2012, finding that *Juarez* lacked
 4 standing to sue any entity for whom he had never worked and that his claims were not typical. RJN
 5 Ex. E, 5:11-13; 9:25-26.

6 1. Plaintiffs Lost At Trial On All Individual and PAGA Claims.

7 After the state court denied class certification without prejudice, Plaintiff made
 8 no further attempt to certify a class. Instead he amended the complaint to name another Plaintiff,
 9 Adrian Ramirez (the same individual added to the *Sandoval* SAC, whom Plaintiffs now claim worked
 10 at Serramonte). RJN Ex. H, ¶16. He did so to attempt to recover damages from Autowest (since *Juarez*
 11 had never worked at Autowest), and to recover wages on behalf of a Private Attorneys General Act
 12 (“PAGA,” Cal. Lab. Code §2699 *et seq.*) class consisting of individuals who worked both at Autowest
 13 and MB as well as the “related entities” described in the complaint. At trial, commencing August 22,
 14 2013 and submitted on January 10, 2014, the plaintiffs sought to recover wages and penalties on behalf
 15 of all similarly-situated employees at each shop. The court issued Judgment in favor of Defendants on
 16 all causes of action on July 9, 2014. RJN, Ex. I.

17 B. Instant Lawsuit.

18 In the meantime, on July 12, 2013, Plaintiffs filed the instant action seeking to represent
 19 “All non-exempt piece rate employees who worked at Defendant entity California auto body shops
 20 within four (4) years of the filing of the original Complaint in this action, plus any tolling from any
 21 State court class actions filed, through the date of final disposition of this action.” RJN Ex. H ¶24.
 22 Plaintiffs now take the position that *Juarez* was only against MB Bodyshop and as such there is no res
 23 judicata or collateral estoppel. At the same time they contend that *Juarez* was against all of the current
 24 defendant entities, invoking California tolling laws to extend the statute of limitations in this case.

25 Plaintiffs’ motion also refers several times to the personal liability of Rick Ali and Bobby Ali,
 26 formerly named individual Defendants. However, this Court dismissed the individual defendants from
 27 this case by its Order of March 28, 2014. RJN Ex. J.

28

1 **IV. PLAINTIFFS' CLAIMS ARE BARRED BY RES JUDICATA AND STATUTE OF**
 2 **LIMITATIONS.**

3 Defendants respectfully refer the Court to the detailed discussion of how Plaintiffs' claims are
 4 barred by res judicata and collateral estoppel, contained in the concurrently-filed Motion to Dismiss.
 5 Defendants contend that because these claims are barred by res judicata and/or collateral estoppel,
 6 class certification is inappropriate.

7 A. Plaintiffs Seek To Certify A Class Outside The Statute.

8 Plaintiffs' proposed Class No. 1 contains "all non-exempt piece rate workers who
 9 worked at Autovest from September 4, 2004 to present." Cert. 14:9-10. The statute of limitations on a
 10 claim for unpaid wages is 2 years under California law or 3 years for a willful violation. 29 U.S.C.
 11 §§255, 255(a); *Haro v. City of Los Angeles*, 745 F.3d 1249, 1258 (2014). Despite taking the position
 12 that the judgment in *Juarez* was not binding on the plaintiffs or class members here, and has no
 13 preclusionary effect, Plaintiffs argue that the statute of limitations here was tolled by the filing of
 14 *Juarez* in 2008. Plaintiffs simply cannot have it both ways. Either *Juarez* was binding and adjudicated
 15 the issues herein, or else it was not binding and therefore did not toll the statute of limitations for the
 16 individuals seeking relief herein. If the court would certify "Class No. 1," it should be limited to non-
 17 exempt piece rate workers at Autowest from July 12, 2009 to present.

18 1. The Instant Action is Nothing More than Forum-Shopping.

19 Plaintiffs could have asserted an FLSA claim in *Juarez* but did not; instead they
 20 decided to withhold evidence regarding each other entity named in that case to "save it" for the federal
 21 action. They added an FLSA claim here to obtain federal question jurisdiction one year after
 22 certification was denied in *Juarez* and when there was an indication from the *Juarez* court it would rule
 23 against them. This attempt at forum-shopping should not be permitted.

24 2. The Statute of Limitations was Not Tolled by Juarez.

25 The majority of federal appellate courts addressing successive class actions
 26 have held that the statute of limitations is *not tolled* for a putative class representative who seeks to
 27 bring a successive class action upon denial of the first class certification. While "Federal law holds that
 28 the filing of a class action tolls the statutes of limitation for all members of the purported class until

1 certification is denied or the case is resolved”), *American Pipe & Construction Co v. Utah*, 414 U.S.
 2 538 (1974) courts have found that if successive class actions were to receive the benefit of such tolling,
 3 the statute of limitations would be tolled indefinitely and the defendant would have to defend
 4 perpetually against repetitive class actions. This would “extend [] the statute of limitations beyond the
 5 wildest dreams of those who enacted it.” *Basch v. Ground Round, Inc.*, 139 F.3d 6, 11 (1st Cir. 1998);
 6 *Salazar-Calderon v. Presidio Valley Farmers Ass’n* 765 F.3d 1334, 1351 (5th Cir. 1985).

7 Indeed, the majority position is that *American Pipe* tolling is not applicable to a later-filed
 8 class action. See *Employers-Teamsters Local Nos. 175 & 505 Pension Trust Fund v. Anchor Capital*
 9 *Advisors*, 498 F.3d 920, 925 (9th Cir. 2007); and *Catholic Social Services, Inc. v. I.N.S.*, 232 F.3d
 10 1139, 1147 (9th Cir. 2000) (en banc) (“CSS”) (“[i]f class action certification had been denied, and if
 11 plaintiffs in this action were seeking to re-litigate the correctness of that denial, we would not permit
 12 plaintiffs to bring a class action”); *Robbin v. Fluor Corp.*, 835 F.2d 213 (9th Cir. 1987) (*American Pipe*
 13 did not allow tolling when class certification previously denied and second action sought to re-litigate
 14 the issue of class certification and circumvent the earlier denial). Plaintiffs “may not piggyback one
 15 class action onto another and thus toll the statute of limitations indefinitely.” *Griffin v. Singletary*, 17
 16 F.3d 356, 359 (11th Cir. 1994); *Salazar-Calderon v. Presidio Valley Farmers Ass’n*, 765 F.2d 1334,
 17 1351 (5th Cir. 1985) (“[W]e decline to adopt any rule that has the potential for prolonging litigation
 18 about class representation any further.”)

19 Here, Plaintiffs are clearly attempting to re-litigate the denial of class certification in *Juarez*.
 20 The plaintiffs are among those who were putative class members in *Juarez*, relying on their
 21 declarations and evidence in the *Juarez* action to support their assertions here. Autovest is identical in
 22 name, and while not named in the caption, Plaintiffs’ complaint includes as Defendants M1 Collision
 23 and Serramonte. RJN, Exh. F. The attorneys are the same. The claims are the same. The statute of
 24 limitations for this successive action was not tolled by the filing of *Juarez*. If any class is certified in
 25 this case, the relevant time period does not extend back to 2004, as Plaintiffs contend, but only to 2 or
 26 3 years before the filing of the complaint in the instant action (2010 or 2011).

1 B. Proposed “Class No. 3” Over-Reaches To Include Employees From Sunnyvale And
 2 Fremont.

3 Plaintiffs’ proposed “Class No. 3” purports to include “all non-exempt piece rate
 4 workers who worked at M1 from July 12, 2009 to present.” Plaintiffs conceded that **No Plaintiff was**
 5 **ever employed at either Sunnyvale or Fremont**, thus if certified, the class is limited to employees of
 6 Concord.

7 **V. CLASS CERTIFICATION SHOULD BE DENIED UNDER RULE 23.**

8 Before certifying a class, the trial court must conduct a “rigorous analysis” to determine
 9 whether the party seeking certification has met the prerequisites of Rule 23. *Valentino v. Carter-*
 10 *Wallace, Inc.*, 97 F.3d 1227, 1234 (9th Cir. 1996). The party seeking certification bears the burden of
 11 demonstrating that all requirements are satisfied. *In re Countrywide Fin. Corp. Sec. Litig.*, No. CV-07-
 12 05295-MCP, 2009 U.S. Dist. LEXIS 129807 at *34 (C.D. Cal. Dec. 9, 2009). Approving a party to
 13 represent and bind absent class members should not be taken lightly; nor should subjecting Defendants
 14 to the enhanced potential liability that comes with a certified class. *Id.* at 35. “The class action device
 15 was designed as an exception to the usual rule.” *Gen. Tel. Co. of the Sw. v. Falcon*, 457 U.S. 147, 155
 16 (1982). Plaintiffs have failed to demonstrate that (1) the class is so numerous that joinder is
 17 impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of
 18 the representative parties are typical of the claims or defenses of the class; and (4) the representative
 19 parties will fairly and adequately protect the interests of the class. Rule 23(a).

20 A. Plaintiffs Do Not Have The Required Numerosity To Certify A Class For Its Opt-In
 21 Flsa Claim.

22 The class must be so numerous that joinder of all members individually is
 23 “impracticable.” FRCP 23(a)(1). The numerosity requirement ensures that the class action device is
 24 used only where it would be inequitable and impractical to require every member of the class to be
 25 joined individually. Courts have found more than 40 members will suffice. *Ikonen v. Hartz Mountain*
 26 *Corp.*, 122 F.R.D. 258, 262 (S.D. Cal. 1988). A class of 15 or fewer has been held too small for
 27 certification. *General Tel. Co. of Northwest, Inc. v. EEOC* (1980) 446 U.S. 318, 330; *Harik v.*

1 *California Teachers Ass'n* (9th Cir. 2003) 326 F.3d 1042, 1051 (rejecting classes of 7, 9, and 10
 2 members).

3 Plaintiff Adrian Ramirez's claims are barred by the doctrine of res judicata or collateral
 4 estoppel, as he sought damages against MB Bodyshop, Autowest and Serramonte in *Juarez*. Plaintiffs
 5 have withdrawn Opt-In Plaintiff Martin Juarez for the same reason and to avoid the conflict they have
 6 with the prior representation. (Doc. No. 92, 5/7/15). After moving for certification Plaintiffs withdrew
 7 Opt-In Salvador Flores Jr. because he was not a piece rate worker (not all technicians are piece rate).
 8 (Doc. 92, 5/7/15). Opt-In Eddy Sifuentes' claims are barred by the doctrine of res judicata because he
 9 was part of the *Juarez* PAGA group, gave testimony as a PAGA class member at trial, and sought to
 10 recover damages against all Defendants herein. With these eliminations, the total number of
 11 participants in the FLSA claim is 5, which is insufficient to meet Rule 23's numerosity requirement.

12 B. Plaintiffs Cannot Show Commonality.

13 Rule 23(a)(2) requires that "there are questions of law or fact common to the class."
 14 Fed. R. Civ. P. 23(a)(2); *Hanlon v. Chrysler Corp.*, 150 F.3d 1011, 1019 (9th Cir. 1998). To satisfy
 15 the commonality requirement, a class claim "must depend upon a common contention...of such a
 16 nature that it is capable of class-wide resolution—which means that determination of its truth or falsity
 17 will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart*
 18 *Stores, Inc. v. Dukes*, 131 S.Ct. 2541, 2551 (2011). The key consideration in assessing commonality is
 19 "not the raising of common questions—even in droves—but, rather, the capacity of a class-wide
 20 proceeding to generate common *answers* apt to drive the resolution of the litigation." *Id.*

21 While Plaintiffs' Motion cites *Ellis v. Costco Wholesale Corp.*, 657 F.3d 970 (9th Cir. 2011)
 22 and *Wal-Mart* for the proposition that "it is insufficient to merely allege any common question," (Cert.
 23 Motion 14:1-2), that is exactly all that Plaintiffs have done. They state, "This case involves the
 24 challenge to system-wide policies and therefore, common questions of law and fact exist..." (Cert.
 25 Motion 14:6-8). Yet they haven't raised common policies regarding overtime, since the policy was to
 26 record all time worked in the shop. In fact employees admit that their keys were taken away and that
 27 they were never told to work off the clock. Plaintiffs' raising common questions as to how much off
 28

1 the clock work might exist is not enough since “any competently crafted class complaint literally raises
 2 common ‘questions.’” *Wal-Mart, supra*, at 2551. Plaintiffs never address the requirement to have
 3 common *answers*. See Table of Issues for Class Certification, Def. Brief, vii.

4 There may be a common question about whether the piece rate system adequately compensated
 5 for overtime and rest breaks, but the answers will definitely be highly individualized. As discussed
 6 below, each worker’s claim is personal and unique – the answer to the question of whether he has been
 7 adequately compensated will depend on (1) whether each actually worked any overtime; (2) whether
 8 the payment of flag rate hours times the flag rate of pay meets the DLSE-approved formula of shop
 9 hours worked multiplied by two times the minimum wage; (3) whether each actually spent any time
 10 waiting for cars to work on and how much; and (4) whether each actually spent time performing tasks
 11 which did not have an associated piece rate or were not incident to the job, and how much time was
 12 spent doing the “other” time that plaintiffs have not uniformly defined. These issues will have to be
 13 explored looking at each worker’s time clock records, piece rate records, and payroll records, for each
 14 week. Soto Dec. ¶28; Gutierrez Dec. ¶28; Davila Dec. ¶30; Bioc Dec. ¶26; Avendano Dec. ¶25.
 15 Further, if the Court were to adopt Plaintiffs’ argument that the sole way to determine what was owed
 16 to an employee on any given day is Example 1 in the DLSE Manual, that example provides that you
 17 must count the amount of flag rate hours that were completed during the first 8 hours of work, and then
 18 count the amount of flat rate hours completed during the overtime calculation. This would require an
 19 individual inquiry into each employees’ productiveness on each and every day to determine what, if
 20 anything, is owed beyond what was paid.

21 1. There is No Commonality on the Rest Break Claim.

22 (a) Bluford Did Not Change the IWC Wage Order.

23 Plaintiffs cite *Bluford v. Safeway Stores, Inc.*, 216 Cal.App.4th 864
 24 (2013) to support their contention that a class action is appropriate to determine whether employees
 25 were compensated for rest breaks under the piece rate system. But the grant of certification in *Bluford*
 26 was **not** a finding that all piece rate pay systems require separate payment for rest breaks. Nor did
 27 *Bluford* in any way change what the applicable wage order requires an employer to track. Defendants
 28

1 were **not** required to track rest periods: “...[A]uthorized rest periods need not be recorded.” IWC
 2 Wage Order No. 9, ¶7(3). Defendants did not separately track payments to Plaintiffs for time spent
 3 resting because that is not something the wage order required to be tracked. *Bluford* did not change
 4 that.

5 In *Bluford*, the plaintiff was a truck driver who worked out of Safeway’s distribution center. A
 6 collective bargaining agreement obligated Safeway to pay employees under an activity-based
 7 compensation system. The drivers in the putative class delivered goods from the distribution center to
 8 stores in Northern California and Nevada. They were paid using a combination of miles driven, a fixed
 9 rate for the number of pallets exchanged, and fractional hourly payments for certain administrative
 10 (non-driving) tasks. Drivers were paid not according to the hours it took to drive between locations but
 11 by miles driven. Plaintiff’s motion to certify was partly based on the argument that rest breaks were
 12 not paid since the mileage system did not factor them in. The trial court denied class certification,
 13 stating that it would require an individualized inquiry as to whether each driver took his break. On
 14 appeal, the Court indicated the issue was not whether the drivers took their breaks, but rather whether a
 15 subclass could be certified based on Safeway’s rest break policy. Safeway argued that the “mileage
 16 rates negotiated in the collective bargaining agreements included paid time for rest periods,” or that the
 17 mileage rate had been increased to compensate for the rest breaks. The court certified a class because
 18 Safeway could not *average* the rest breaks with the time associated with mileage because mileage was
 19 not measured by the hour.

20 The instant case is very different. Plaintiffs were paid an hourly flag rate based upon their total
 21 flag rate hours, and on rare days when there was no flag time, they were paid an hourly rate for their
 22 hours in the shop. Long Dec., Ex. 19 (Nguyen Trial Tes. at 102:22-103:5, 138:10-139:10, 141:9-15,
 23 Ex. 227). In *Bluford*, the truck driver was expected to take his rest break during the time he was driving
 24 and was paid only for miles driven, not by the hour. In contrast, here there is no claim of an unlawful
 25 policy; further technicians were paid by the flag hour and received paid rest breaks in the same way
 26 that an hourly employee like a waitress in a restaurant would.

27

28

1 Additionally, the answer to whether Plaintiffs were compensated for rest breaks also differs
 2 based on whether they took rest breaks: Plaintiffs have testified inconsistently about breaks: some said
 3 they always took breaks, some took one a day, and others chose to work through permitted breaks.
 4 Long Dec., Exs.6 (Sandoval at 68:24-69:25 [used cell phone, got drinks]), 8 (Flores 83:5-23, 84:3-13
 5 [took rest breaks, walked around building]), 10 (Lopez, Sr. at 72:18-73:14 [watched soccer games, got
 6 drinks as needed]), 9 (Llamas at 24:17-21, 34:3-20 [took a few breaks to get a drink or a snack]), 4
 7 (Calixto at 43:10-25, Ex.24, 45:20-21, 47:16-18), 6 (Sandoval at 58:3-59:16, 68:24-70:3, 92:16-93:6),
 8 7 (Barrios at 53:12-55:25 [could have taken a break but never did]), 12 (Sifuentes at 28:10-30:9 [never
 9 took a break but knew he was permitted]), 5 (Ramirez at 65:10-66:20, [never took breaks but could
 10 have]), 11 (Lopez, Jr. at 26:16-25). Since the issue presented is not one of policy but rather what each
 11 individual chose to do, there is no commonality.

12 (b) Bluford Was Premised On Unlawful Averaging Not Present Here.

13 The *Bluford* court certified a class because Safeway could not *average*
 14 the rest breaks with the time associated with mileage because mileage was not measured by the hour.
 15 In doing so it relied in part on *Armenta v. Osmose, Inc.*, 135 Cal.App.4th 314 (2005), which Plaintiffs
 16 also cite. In *Armenta*, the defendant's business included maintaining standing wood utility poles for
 17 major utility companies. Employee hours were classified as productive or nonproductive based on
 18 whether the hours were directly related to maintaining the poles. Employees claimed they were not
 19 compensated for time spent traveling, loading equipment, doing paperwork, and maintaining company
 20 vehicles.

21 The *Armenta* court, like the court in *Bluford*, was reviewing what an employer's obligations are
 22 when there is an interplay between a collective bargaining agreement (which is not present here), a
 23 California wage order, and FLSA. Employers of *Bluford* and *Armenta*'s reliance on unlawful
 24 collective bargaining agreements and use of averaging demonstrates that neither case controls in
 25 determining certification.

26 (c) After *Bluford*, *Vasquez* Denied Certification Of Piece Rate Workers'
 27 Rest Break Claim; Saw Individualized Inquiry.

1 Plaintiffs fail to cite a case decided subsequent to *Bluford*, which denied
2 the certification of a class of piece rate workers asserting that they were not properly compensated for
3 rest breaks. In *Vasquez v. First Student, Inc.*, Case No. 2:14-CV-06760-ODW, 2015 U.S. Dist. LEXIS
4 30631 (C.D. Cal. March 12, 2015), bus drivers asserted that the piece rate system did not satisfy
5 minimum wage requirements and did not pay for rest breaks. The Court found that said issues could
6 not “be resolved on a class-wide basis.” *Id.* at *17. With respect to the rest break claim, the court
7 stated, “... an individualized inquiry is also necessary to determine if Defendants in fact did not pay
8 Drivers for rest breaks.” The court found it would have to determine whether any driver worked more
9 than 3.5 hours on any given day (to be eligible for a rest break), whether the route the driver drove that
10 day allowed him/her to take a paid rest break, and whether the driver received any paid time for time
11 that he/she did not actually work that day on account of the guaranteed minimum paid hours, because
12 the IWC Wage Order requires rest breaks for hours *actually worked*. *Id.* at *18. The court held that
13 “individual issues will ‘overwhelm’ whatever common issues might exist” relating to Plaintiff’s
14 proposed classes. The same is true here. Employees have testified that if there was no work they could
15 go home. Long Decl., Ex. 4, (Calixto at 44:23-45:2); Avendano Dec. ¶14; Davila Dec. ¶19; Bioc Dec.
16 ¶13; Gomes Dec. ¶15; Hernandez Dec. ¶10; Soto Dec. ¶15. So whether an employee was actually at
17 work not working at the direction of the employer or not will require an individual inquiry, which will
18 then determine if time is owed for a break.

2. No Commonality on “Waiting” or “Administrative” Time Claims.

20 Plaintiffs' attempt to rely on *Gonzalez v. Downtown LA Motors, Inc.* (2013) 215
21 Cal.App.4th 36 is misplaced for the proposition that there is common proof that class members are
22 owed for administrative time. *Gonzalez* did not involve auto body repair hourly piece rate workers like
23 we have here, but rather auto mechanics paid by the "unit." They were paid for the time actually spent
24 doing each repair – not an industry-standard number of hours assigned to a particular repair. For
25 example, if the flag hours associated with a repair were 5.5 hours, and the employee did the work in
26 3.5 hours, the *Gonzalez* employee was only paid 3.5 hours, whereas here they were paid 5.5 hours for
27 3.5 hours of work.

1 Plaintiffs' own evidence further distinguishes this case from *Gonzalez*. First, in *Gonzalez*,
 2 there was a written rule in the employee handbook that workers were required to work an 8-hour shift
 3 and had to remain on the premises even when there was no piece rate work to do, which written rule
 4 was confirmed through testimony of two managers. In contrast, Plaintiffs here have presented no
 5 evidence that there was any requirement that they stay a full 8 hours when there was no piece rate
 6 work; most said they could leave. Long Dec., Exs. 6 (Sandoval at 46:16-47:2, 76:1-12), 8 (Flores at
 7 65:7-12), 4 (Calixto at 44:23-45:2). Eddy Sifuentes admitted there was no rule that he remain at work;
 8 he further testified that if there were time clock records showing that he clocked out earlier than 8
 9 hours, they would be more reliable than his memory. Long Dec. Ex. 20 (Sifuentes Trial Tes. at 133:13-
 10 22). Even Plaintiff Ramirez admitted that he could have asked to leave early if his work was
 11 completed and that permission probably would have been granted. Long Dec. Ex. 21 (Ramirez Trial
 12 Tes. at 165:24-166:6). Hugo Gonzalez confirmed that many weeks he worked just 2-3 days per week
 13 and that while he did have to tell someone he was leaving, he was allowed to leave. Long Dec. Ex. 22
 14 (Gonzalez Trial Tes. at 81:24-82:8, 83:17-22). Oscar Davila also testified that when he finishes early
 15 he leaves. Davila Dec. ¶19. Clearly, the facts are divergent from *Gonzalez*.

16 Second, in *Gonzalez*, when workers did not have piece rate work available, they were required
 17 to perform tasks which were not incident to repairs, such as driving from the shop to customer
 18 locations and back to retrieve or deliver vehicles or attending online training sessions. In the instant
 19 case, Plaintiffs have not presented any evidence that they were required to do any "administrative"
 20 work which was not incident to the piece. Instead, they claim had to clean up their work areas (which
 21 consists of tossing paper or plastic into a bin and wiping down their tools between jobs), which was
 22 incident to the repair job and took very little time and attend training. In regards to training, all of the
 23 plaintiffs admit that they were paid hourly for their time attending training. Long Dec. Ex. 8 (Flores at
 24 57:25-58:8), 10 (Lopez, Sr. at 37:13-24), 9 (Llamas at 12:2-23), 7 (Barrios at 36:16-21), 5 (Ramirez at
 25 44:9-12 [does not remember if he attended trainings]). When pressed as to what "other" work they had
 26 to do, none could state with any clarity. Manuel Llamas stated his only work was to work on cars.
 27 Long Dec. Exs. 9 (Llamas at 49:19-50:2) and 5 (Ramirez at 44:13-19).

28

Third, in *Gonzalez*, the employer averaged the shop work hours against the unit hours for each job to arrive at the employees pay. By contrast, Defendant employees' pay was not averaged; rather employees were paid at their hourly rate for each hour of work performed. Long Dec. Exs. 6 (Sandoval at 79:9-80:8, 82:8-83:13, Exs. 1 and 7), 8 (Flores at 40:19-41:22), 12 (Sifuentes at 60:9-13), 10 (Lopez, Sr. at 59:25-60:10), 9 (Llamas at 20:19-21:12), 7 (Barrios at 26:9-28:1), and 4 (Calixto at 29:4-8).

(a) Plaintiffs Cannot Show Common Answers Regarding Waiting Time And Other Work; the Claims are Individual and Cannot be Measured.

8 Plaintiffs in this lawsuit contend that the time they spent cleaning up
9 their work area, waiting for a car to be assigned or attending a meeting should be time that they are
10 additionally compensated for because in their opinion this is not included in the flag rate hours
11 assigned to a job. This opinion directly contradicts Mr. Krause, who indicates that the flag rate hours
12 are derived from efficiency studies based on the average worker using average tools including all
13 reasonable rest times and clean up times. Long Decl., Ex. 26 (Krause Trial Tes. at 1812:13-1813:4;
14 1819:12-1822:22). Regardless of the facts that directly contradict their theory, there are no records
15 demonstrating how much time, if any, any particular employee spent “waiting.” Defendants were not
16 required to keep records of “administrative time.” Labor Code §226(a)(3) merely obligates employers
17 to show the applicable piece rate (dollar amount) and total piece-rate earnings (total share of piece)
18 over an entire pay period. This is consistent with the DLSE’s position:

You are not required to pay separately for time spent in pick-up or clean-up or for company meetings at which attendance is compulsory. However, time spent in all such activities is considered work time and must be paid for at a piece rate which results in total compensation of not less than the minimum wage plus overtime if applicable, as described above. DLSE Bulletin 84-3. RJD, Ex. K.

22 Each defendant entity employs a production manager who assigns work. Workers are not
23 assigned a single car at a time. Rather, each worker's bay can accommodate at least two cars, and
24 workers generally have 5 cars assigned to them at a time, so that they can move between vehicles if
25 one is being painted, needs a part or requires further authorization. While each plaintiff acknowledges
26 the work flow process, their declarations conclude they had no work at times. However, upon
27 questioning at deposition, their "waiting" times were far from routine and consistent. First, none are

1 able to identify how much time they had to wait for work. Second, it appeared that any wait time was
 2 an exceptional circumstance. For example, Francisco Lopez said in his 10 years of employment he had
 3 to wait maybe 10 times for work and he couldn't say how long he waited. Long Dec. Exs. 10 (Lopez,
 4 Sr. at 22:4-15, 28:11-29:24), 11 (Lopez, Jr. at 39:10-17). Further, Eddy Sifuentes testified that he too
 5 was always busy and he couldn't really remember having down time. Long Dec. Ex. 12 (Sifuentes at
 6 18:20-19:3, 22:17-23:10). By contrast, Manual Llamas testified he had to often wait for work 2-3
 7 hours a day, but then contradicted himself by stating he would work Saturdays because he was so busy.
 8 Long Dec. Ex. 9 (Llamas at 25:1-19). Shop employees are busy on a regular basis and enjoy a constant
 9 flow of work. Long Dec. Exs. 6 (Sandoval at 44:1-22, 51:6-9), 10 (Lopez, Sr. at 26:1-10), 4 (Calixto at
 10 47:22-48:12), 11 (Lopez Jr. at 28:5-17), 9 (Llamas at 13:6-17); Avendano Dec. ¶6; Bioc Dec. ¶7;
 11 Davila Dec. ¶7; Fuentes Dec. ¶6; Gomes Dec. ¶6; Gutierrez Dec., ¶6; Hernandez Dec. ¶6; Mata Dec.
 12 ¶6; Mendieta Dec. ¶5; Prado Dec. ¶6; Soto Dec. ¶5. Since Defendants didn't track actual repair time, if
 13 the employee completed a 12 hour job in 7 hours, there is nothing to reflect that 7 hours. Long Dec.
 14 Exs. 6 (Sandoval at 56:25-57:2, 79:17-80:11), 8 (Flores at 67:17-68:14), 12 (Sifuentes at 22:17-23:10),
 15 7 (Barrios at 34:22-35:4), 5 (Ramirez at 61:13-63:5).

16 Courts routinely deny motions for class certification when substantial evidence is lacking.
 17 *Dailey v. Sears, Roebuck & Co.*, 214 Cal.App.4th 974, 989 (2013). Here, Plaintiffs concede they have
 18 no evidence of the amount of time that they spent "waiting" for work. Thus there is no common
 19 answer as to what a particular employee did waiting and it is impossible to determine if there is in fact
 20 uncompensated time that an individual employee may be owed.

21 (b) Whether An Employee Had Uncompensated Administrative Time Is
 22 An Individual Inquiry.

23 Plaintiffs' reliance on *Bibo v. Federal Express, Inc.*, No. C-07-2505-
 24 TEH, 2009 WL 1068880 (N.D. Cal. April 21, 2009), to establish that common questions exist about
 25 money owed for administrative time, is misplaced. *Bibo* involved a class of FedEx employees who
 26 claimed they were not being paid in accordance with state law since FedEx relied on the federal Portal-
 27 to-Portal Act requirements. Further, the *Bibo* court held the *de minimis* rule does apply "where there
 28

1 are uncertain and indefinite periods of time involved of a few seconds' or minutes' duration, and where
 2 the failure to count such time is due to considerations justified by industrial realities" (citing DLSE
 3 Manual §47.2.1)⁷. Here, none of the Plaintiffs have been able to articulate what constitutes
 4 "administrative" time, or whether such "administrative time" was what resulted in overtime. Long
 5 Dec. Ex. 24 (Albright Dec. Ex. B showing de minimis overtime).

6 While it is true that Defendants required employees to go to trainings, employees universally
 7 confirmed they were paid at their hourly rate for all such time spent attending training relating to their
 8 job. Long Dec. Exs. 8 (Flores at 57:25-58:8), 10 (Lopez, Sr. at 37:13-24), 9 (Llamas at 12:2-23), 7
 9 (Barrios at 36:16-20); Avendano Dec. ¶13; Davila Dec. ¶18; Gomes Dec. ¶14; Gutierrez Dec. ¶11;
 10 Mata Dec. ¶11; Prado Dec. ¶11; Soto Dec. ¶14. Defendants did not have a policy of requiring
 11 employees to attend daily meetings. Certain employees have testified in declarations submitted in
 12 support of class certification that they had "other" time they spent attending meetings or otherwise
 13 doing non-piece rate work. However, no employee has quantified any amount of time spent going to
 14 meetings that were not paid at the hourly rate of pay, nor has any employee been able to identify what
 15 "other" work they did other than repairing cars. For example, Manual Llamas was asked about what
 16 else he did at work other than car repair and he said nothing. Long Dec. Ex. 9 (Llamas at 49:19-50:2).
 17 Therefore, absent evidence of each defendant requiring employees to attend regular meetings or do
 18 other work, the issue of whether an employee attended meetings, with what frequency and duration as
 19 well as the nature of what other work they performed will require an individual analysis.

20 (c) Defendant Entities Did Not Have an Off-the-Clock Policy; Therefore
 21 Certification is Not Appropriate.

22 Plaintiffs' theory with respect to overtime is that the piece rate system
 23 did not properly compensate workers for overtime. Plaintiffs frame the issue as: "Does Autovest's,
 24 Serramonte's, and M1's failure to method [sic] of calculating overtime wages owed to piece rate
 25 workers run afoul of California labor law." In order to show facts demonstrating that no individualized

26
 27 ⁷ Plaintiffs' citation to *Weigle v. FedEx Ground Package System, Inc.*, No. 06cv13302008, WL 410691 (S.D.Cal.
 28 2008) is also improper since that case was subsequently decertified in 2010 based on a change in law, and ultimately
 dismissed based on the decisions establishing precedent. *Weigle v. FedEx Ground Package Sys.*, 06-CV-1330 JLS,
 2010 U.S. Dist. LEXIS 120475 (S.D. Cal. Nov. 15, 2010).

1 inquiry would be required to decide this question, they refer the Court to Section II.F of their brief.
 2 However, there is no II.F.

3 Plaintiffs argue in their recitation of facts that Defendants' method of ensuring that employees
 4 were paid for each hour worked at their hourly rate of pay is unlawful, and cite an incomplete version
 5 of the DLSE Manual. Cert. Mot. 7:25-8:17. Defendants urge the Court to review Plaintiffs' Request
 6 for Judicial Notice and reject it. The DLSE Manual is over 300 pages. Section 2-2 indicates that
 7 various forms of piece rate calculations exist, and recognizes the book rate as an accepted method.
 8 RJN, Ex. N. (DLSE Manual § 2.2).

9 Section 49-1 of the DLSE Manual recognizes that piece rate plans can be executed in various
 10 ways and still be compliant with the law, but the DLSE Manual does not attempt to state an exhaustive
 11 list of those methods. Plaintiffs' presentation of only one method—which requires calculating how
 12 many "pieces" were completed during the first 8 hours of work, and how many "pieces" were
 13 completed during the overtime period, suggests to the Court that there is but one way and that
 14 Defendants' piece rate system did not comply with it. This is false. Further, pursuant to Executive
 15 Order S-2-03, the DLSE opinion letters and the DLSE Manual are currently under review to determine
 16 their legal force and effect and to ensure compliance with the requirements of the Administrative
 17 Procedures Act. DLSE opinion letters offer advice and guidance on the facts of specific cases only.
 18 RJN, Ex. P.

19 Plaintiffs offer no means by which Defendants could calculate now, based on the records in
 20 this case, how many flag hours were completed in the first 8 hours the employees worked or how
 21 many flag hours were completed during the overtime period. Plaintiffs' own declarations state that
 22 they did not track the hours they spent working on a particular vehicle. Calixto Dec. ¶15, Llamas Dec.
 23 ¶11, Flores Dec. ¶12, and Lopez, Sr. Dec. ¶17. It is impossible to tell when an employee worked on a
 24 car, whether it was in the first 8 hours of a workday or later, whether the flag hours associated with the
 25 repair were completed in one workday or spanned several days; the variances are endless. Further, the
 26 proposed formula cited by Plaintiffs would apply only to body men, and not painters who worked in
 27 teams and were paid a split of the team's total flag rate hours each week, which is also recognized as a
 28

1 legitimate pay method by the DLSE. R.J.N., Ex. N. (DLSE Manual § 49.2.2). Plaintiffs' proposal as to
 2 how to calculate liability, coupled with the diverse methods by which the piece rate may be calculated,
 3 demonstrates the unmanageability of these issues on a class-wide basis; therefore, class certification is
 4 not appropriate.

5 Here, despite time records demonstrating overtime, Plaintiffs claim they had additional hours
 6 beyond that reflected in their time cards. They have confirmed they were never told to work off the
 7 clock, but they simply ignored the rule. Long Dec. Exs. 12 (Sifuentes at 27:7-10), 6 (Sandoval at 56:25-
 8 57:2, 79:17-80:11), 8 (Flores at 67:17-68:14), 7 (Barrios at 32:19-25), 5 (Ramirez at 61:13-63:5).

9 Plaintiffs rely heavily on the deposition testimony of Alex Astts, Director of Operations to
 10 assert the pay practice was unlawful. However, Mr. Astts was very clear during his deposition that he
 11 was not personally familiar with how the auditing for the piece rate method of pay was done, but that
 12 he reviewed it for purposes of preparing for his deposition as Person Most Knowledgeable. Astts Dec.
 13 ¶23. He deferred to Emily Nguyen, the former Controller for the corporate defendants. Ms. Nguyen,
 14 who is no longer with Autowest, testified previously at deposition and during trial in *Juarez*. She
 15 again confirmed during a third party deposition in this case that the piece rate method was designed to
 16 ensure that each employee was being paid for all hours worked at his hourly rate of pay. She described
 17 how she performed a calculation to ensure that the employees' pay based on flag hours met or
 18 exceeded what they would have earned had they been paid hourly and received overtime. Long Dec.
 19 Ex. 27, 18 (Nguyen 2015 at 72:13-73:8, 76:16-20, 78:22-79:25). The fact that Plaintiffs omit Mr.
 20 Astts' deferral to Ms. Nguyen, and ignore Ms. Nguyen's testimony completely in an effort to shoehorn
 21 certification is an attempt to obscure evidence which demonstrates that Defendants' piece rate practice
 22 was lawful.

23 Plaintiffs fail to show a common core of facts that affects all proposed class members with
 24 respect to working off-the-clock. *See Alonzo v. Maximus, Inc.*, 275 F.R.D 513, 522-523 (2011) (Off-
 25 the-clock claim did not meet commonality requirements where evidence only showed a practice in a
 26 single location). Plaintiffs assert that they did not regularly use a time clock to track the hours they
 27 spent working in the shop, but often worked before and after their regularly-scheduled shift, and that
 28

1 their piece rate hours did not fully compensate them for this time. As discussed herein, these off-the-
 2 clock claims are routinely denied as inappropriate for class certification given the inability to measure
 3 damages. Where an individualized assessment is necessary to ascertain whether in fact any employees
 4 worked “off-the-clock,” the claim is not susceptible to common proof. Further, Plaintiffs have failed
 5 to point to any reliable testimony stating that Defendants knew or should have known if any work was
 6 being done off the clock, as required before overtime can be awarded.⁸

7 Collective actions are routinely denied in off-the-clock claims. Courts have found claims of
 8 off-the-clock work “too individualized to warrant collective action treatment,”⁹ and that questions of
 9 fact would likely differ among class members because each had worked in different locations with
 10 different supervisors. *Diaz v. Electronics Boutique of America, Inc.*, No. 04-CV-0840E, 2005 WL
 11 2654270 at *1 (W.D.N.Y. 2005). See also *West v. Border Foods, Inc.*, No. 05-2525, 2006 WL
 12 1892527, at *9-10 (D. Minn. July 10, 2006) (conditional certification denied because proposed class
 13 members were employed at different store locations, were deprived of overtime pay by varying means,
 14 and claimed different numbers of unpaid hours per week. The absence of widespread violations, along
 15 with the individualized nature of those violations actually alleged, precluded a finding that conditional
 16 certification was appropriate). Similarly, in *Brothers v. Portage National Bank*, the court denied
 17 collective action certification where employees claimed they were required to work after clocking out
 18 for the day, holding that the plaintiff had not presented legitimate evidence of a single policy or plan
 19 that “permeated” all of the employer’s offices. *Brothers v. Portage Nat’l Bank*, No. 3:05-94, 2007 WL
 20 965835, at *7 (W.D. Pa. Mar. 29, 2007). Here, the evidence presented is that there was a required time
 21 clock and that there are time clock records. In 2009 or 2010 the employees’ keys to the shop were

22 ⁸ Employer must know or should have known that employee was working overtime or report the overtime hours.
 23 Either way, the employee bears some responsibility for the proper implementation of overtime. *White v. Baptist Meml.*
 24 *Health Care Corp.* 699 F.3d 869 (6th Cir. 2012). Where an employer has no knowledge that an employee is engaging
 25 in overtime work and employee fails to notify the employer or deliberately prevents his employer from acquiring
 26 knowledge of the overtime work, the employer’s failure to pay overtime hours is not a violation of the FLSA. *Forrester*
 27 *v. Roth’s I.G.A. Foodliner, Inc.*, 646 F.2d 413, 414 (9th Cir. 1981).

28 ⁹ *Forrand v. Federal Express Corp.*, Case No. 2:08-cv-01360-DSF-PJW (C.D. Cal., Apr. 25, 2013). Citing *Comcast*,
 29 the Central District declined to certify a class of hourly workers in an off-the-clock case. The district court concluded
 30 that the plaintiffs could not meet *Comcast*’s requirement to develop a method to measure damages and tie each class
 31 member’s recovery to that theory in a reliable manner that could be managed on a class-wide basis. See also
 32 *Washington v. Joe’s Crab Shack*, 271 F.R.D. 629 (2010) (certification denied where off-the-clock claim would require
 33 individualized testimony from employees).

1 taken away and they could only work when the shop was open. Long Dec. Ex. 10(Lopez, Sr. at 64:10-
 2 21). Clearly there was no policy that employees work without reporting their time.

3 It is also appropriate to deny conditional certification where fairness and procedural
 4 considerations would prohibit it. *Basco v. Wal-Mart Stores, Inc.*, No. CIV. A. 00-3184, 2004 WL
 5 1497709 (E.D. La. July 2, 2004) at *8. In *Diaz v. Electronics Boutique of America, Inc.*, No. 04-CV-
 6 0840E(Sr), 2005 WL 2654270 (W.D.N.Y. 2005) at *5, the court found that where different purported
 7 class members' circumstances included different managers, locations, and hours, conditional
 8 certification was not appropriate, because the court would have to examine when each plaintiff was
 9 scheduled to work, when they actually worked, whether they were paid for that time, and whether their
 10 time was altered. Here, the employees have varying accounts of their hours worked and their
 11 practices. For example, one employee indicated he had a key for one year that enabled him to work
 12 whatever hours he wanted without reporting them (*Id.*), another indicated that he was always slow and
 13 worked the hours the shop was open (Long Dec. Ex. 9 (Llamas at 14:2-20), another indicated he would
 14 squeeze through a back door of the shop to get out—indicating that no one knew he was working Long
 15 Dec. Ex. 4 (Calixto at 65:12-67:1). Not one Plaintiff testified that he was required to work hours
 16 without reporting them to the company. Long Dec. Ex. 9 (Llamas at 32:9-22). There are 3 distinct
 17 entities whose respective shop managers separately managed and decided how to implement and
 18 execute the piece rate system and how their employees would be compensated. The testimony from
 19 putative class members indicates that there are vast differences in hours worked, and in the amount and
 20 frequency of working “off the clock.” Plaintiffs offer no method by which common proof or answers
 21 could be obtained absent a series of mini-trials regarding the additional hours of overtime each
 22 employee had beyond what is shown in the time records.

23 3. The Alleged Rest Break Violations Do Not Meet Commonality Standard

24 Plaintiffs' claim regarding rest breaks is not based on the lawfulness of the
 25 policy, but rather on their test theory that because the hours paid to employees were piece rate hours,
 26 the employees were not properly compensated for breaks. However, the facts and the law do not
 27 support this assertion. As an initial matter, Plaintiffs take a snippet from the declaration of Mr. Astts to
 28

1 assert that employees were not paid for rest breaks. That is misleading and false. Mr. Astts testified
 2 that he was not aware exactly of how the pay method worked but that he didn't believe that piece rate
 3 workers were paid an "additional" 10 minutes for each 3.5 hours of work. Long Dec. Ex. 16; Astts
 4 Dec. Ex. █. Further, Ms. Nguyen testified in *Juarez* that employees were paid for rest breaks. Long
 5 Dec. Ex. 19 (Nyugen Trial Tes. at 42:18-43:25.) Once again, the fact that Plaintiffs would obscure
 6 from the Court all of the testimony of the former Controller who was in charge of payroll demonstrates
 7 they are trying to force certification where it is not appropriate.

8

9 4. The Claim for Inaccurate Wage Statements Requires Individual Inquiry as to
Specific Injuries.

10 It is undisputed that each week each defendant entity provided each employee
 11 with a sheet summarizing all piece rate hours for which they would be compensated, a document
 12 showing them all hours they had reported as being worked, and a pay check. See RJD, Ex. T, p. 2
 13 (stating that the purpose of Section 226 "is to provide transparency as to the calculation of wages" and
 14 "to allow employees to maintain their own records of wages earned, deductions, and pay received").
 15 Thus, Section 226 only penalizes employers who do not accurately describe the monies being paid; it
 16 does not prescribe a penalty for omission of a description of monies not being paid. Here, Plaintiffs
 17 concede that the wage statements received accurately displayed the Section 226(a) information with
 18 respect to what was paid to them, the hours reported having worked and piece rate hours.

19 Therefore, even if Plaintiffs could establish that each alleged wage statement violated Section
 20 226(a) (which they cannot), each would still need to establish that he or she suffered a concrete
 21 "injury" as a result. *See Villacres v. ABM Industries, Inc.*, 384 Fed. Appx. 626, 627-28 (9th Cir. 2010)
 22 [actual injury is a prerequisite for a plaintiff to recover any penalties under Section 226(e); *Elliot v.*
 23 *Spherion Pacific Work, LLC*, (C.D. Cal. 2008) 572 F. Supp. 2d 1169, 1180-81, *aff'd* 368 Fed. Appx.
 24 761 (9th Cir. 2011) (granting summary judgment to employer because plaintiff failed to show injury
 25 resulting from defective wage statements; holding that proof of liability requires proof that the plaintiff
 26 was injured); *Jasper v. C.R. England, Inc.*, No. CV 08-5266-GW, 2009 U.S. Dist. LEXIS 34802, *15
 27 (C.D. Cal. Mar. 30, 2009) (plaintiff must demonstrate both intentional non-compliance and a resulting
 28

1 injury in order to recover under Section 226(e)); *Velasquez v. Khan*, No. CIV. S 01-0246 MCE DAD,
 2 2005 U.S. Dist. LEXIS 34681, at *10 (E.D. Cal. Jul. 11, 2005) (after a bench trial, denying plaintiffs'
 3 request for damages under Section 226(e) because plaintiffs failed to show injury).

4 As Defendants' practices complied with the law it will be upon each employee to show how he
 5 was injured by the documentation he received. In the mere 6 lines Plaintiffs' motion devotes to this
 6 issue, Plaintiffs offer no common method of proof that may be utilized at trial.

7 C. Plaintiffs Have Not Shown The Typicality Required For Class Certification.

8 The typicality requirement of Rule 23(a)(3) is very similar to the standard for
 9 commonality: "representative claims are 'typical' if they are reasonably co-extensive with those of
 10 absent class members; they need not be substantially identical." *Hanlon v. Chrysler Corporation*, 150
 11 F.3d 1011, 1020 (2011). "The test of typicality is whether other members have the same or similar
 12 injury, whether the action is based on conduct which is not unique to the named plaintiffs, and whether
 13 other class members have been injured by the same course of conduct." *Hanon v. Dataproducts Corp.*,
 14 976 F.2d 497, 508 (9th Cir. 1992). Here, despite having four Plaintiffs, the claims are not typical.

15 Plaintiffs' proposed classes are structured to include all piece rate workers at the respective
 16 corporations during a certain period of time. Body men, painters, preparers and polishers were all paid
 17 on the piece rate basis for some duration at each body shop during the relevant time period. However,
 18 each Plaintiff's or proposed class member's claims are not typical of the other.

19 1. Body Men Were Paid Differently Than Paint Team Members.

20 Body men were paid differently than painters, preparers and polishers. Body
 21 men typically worked alone (though Salvador Flores had an assistant, which is discussed in more detail
 22 below). They were paid a sum which represented the total flag hours they completed in a week,
 23 multiplied by their flag rate (usually between \$19-\$22/hour). They did not have to split or divide their
 24 flag rate hours with anyone. Contrast the payment method for body men with that for the painters,
 25 preparers and polishers, which was called the "Pie System." These men worked on teams. The total
 26 flag rate hours completed by the entire team for the week were compiled and multiplied by the
 27 painter's flag rate. That dollar amount was then split, according to percentages decided by the painter,

1 among the various team members. Long Decl. Ex. 24 (Rich Albright Dec. ¶4). For example, Rafael
 2 Sandoval's percentage varied from 10-20 percent based upon his skill level, the shop that he worked at,
 3 the number of members on his team in a given week. Long Decl. Ex. 6 (Sandoval at 12:16-14:17). This
 4 is appropriate under DLSE Manual § 49.2.3. RJD, Ex. N.

5 2. Variations Exist in Application of Piece Rate System.

6 Differences exist in the way various body men were paid, which further
 7 demonstrate an absence of typicality. Body man Francisco Lopez, Sr. is unique in that he did not work
 8 alone – he was assisted by his son Francisco Javier Lopez, Jr. from time to time. Francisco Lopez, Sr.
 9 would split his flag rate hours to give his son a portion of them, there were other father/son teams.
 10 Long Decl. Exs. 10 (Lopez, Sr. at 73:18-74:10) and 11 (Lopez, Jr. at 11:18-13:12, 29:17-30:19).

11 3. Different Paint Teams Were Compensated Differently.

12 With respect to the paint teams, there are significant differences in how various
 13 paint teams are compensated. At some shops, the paint team consists of a painter, 1-2 preppers, and a
 14 polisher, each of whom participates in the split. Bioc Dec. ¶9; Davila Dec. ¶8. In other situations, the
 15 polisher is not paid a split of the flag hours—only the painter and the prepper(s). In those situations, the
 16 polisher is paid on an hourly basis. Soto Dec. ¶8. Plaintiff Sandoval declared, “I worked in the San
 17 Jose shop...At Concord the pay system was the same piece rate except that there we did not have to
 18 pay for the polisher from our money...” Sandoval Dec. ¶11. In a third set of circumstances,
 19 sometimes the painter is paid on the flag rate basis but the preparers are paid on an hourly basis.
 20 Avendano Dec. ¶8.

21 Also, at some shops, the percentage split among the paint team remained consistent from week
 22 to week (Mendieta Dec. ¶9) while at other shops, the percentage would change from week to week
 23 depending how much of the work he actually did or how complicated the jobs were. Sandoval Dec.
 24 ¶5; Davila Dec. ¶14; Bioc Dec. ¶9.

25 4. Not All Putative Class Members were Piece Rate Workers for the Entire Class
 26 Period.

Many individuals who were paid on the piece rate system at first were paid by the hour, often during the relevant period. Avendano Dec. ¶3; Bioc Dec. ¶3; Gomes Dec. ¶3; Mata Dec. ¶ 3. It is impossible to state with certainty that each person included in Plaintiffs' sweeping class definition was paid on the piece rate system for the entirety of the relevant class period, without conducting an individual inquiry as to that fact.

5. The Detail “Deduction” Was Not A Policy Across The Putative Class.

The claim for deduction from the flag rate hours for detail is not relevant to every shop or every potential class member. While some body men have testified that they had to give a portion of their flag rate hours to the detailer since they themselves did not perform that work (Fuentes Dec., ¶7), others testified that they did *not* have to give a portion of the flag rate hours to the detailer; the detailer was paid separately. Gutierrez Dec. ¶8; Mata Dec. ¶7; Hernandez Dec. ¶3 (wherein he testifies he was first hired at Serramonte as a detailer and was paid by the hour). Further, the detail “deduction” applies only to certain body men, and not to any of the painters, preparers or polishers. Bioc Dec. ¶8. Therefore, a body man’s claims for deduction for detail would not be typical of other putative class members’ claims.

6. The Uniform Deduction Did Not Affect All Putative Class Members.

Finally, the claim for a deduction from pay for cleaning of a uniform is unique to certain shops. Again, the testimony has been that this did not take place at every shop for the entire proposed class period, and that where it does take place, it is not consistently done from week to week. Fuentes Dec. ¶2; Hernandez Dec. ¶22.

D. Plaintiffs' Counsel Do Not Adequately Represent The Class.

While counsel asserts in conclusory fashion that they are suitable to act as class counsel, they ignore their blatant conflict of interest, which the Court previously indicated it would consider at the certification stage. Defendants respectfully refer the Court to the arguments regarding class counsel's conflict contained in the concurrently-filed Motion to Disqualify Class Counsel, and assert that this conflict prohibits adequate representation.

1 **VI. THIS CASE CANNOT BE CERTIFIED AS A CLASS UNDER RULE 23(B)(2).**

2 The Supreme Court in *Wal-Mart Stores, Inc. v. Dukes, supra*, 131 S.Ct. 2541, held that Rule
 3 23(b)(2) applies only when “a single injunctive or declaratory judgment would provide relief to each
 4 members of the class,” not when individuals seek an individual award of monetary damages. *Id.* at
 5 2557. By its very nature, the recovery of money is central to this litigation, making a claims under Rule
 6 23(b)(2) improper. A class may be certified under Rule 23(b)(3) where questions of law or fact
 7 common to members of the class predominate and a class action is superior to other available methods
 8 for fairly and efficiently adjudicating the controversy. Plaintiffs have not satisfied that burden with
 9 respect to any of their claims.

10 A. Individual Issues Predominate All Of Plaintiffs' Claims.

11 “Predominance “tests whether proposed classes are sufficiently cohesive to warrant
 12 adjudication by representation,” a standard “far more demanding” than the commonality requirement
 13 for Rule 23(a). *Amchem Prods, Inc. v. Windsor*, 521 U.S. 591, 623-24 (1997). “When common
 14 questions present a significant aspect of the case and they can be resolved for all members of the class
 15 in a single adjudication, there is clear justification for handling the dispute on a representative rather
 16 than on an individual basis.” *Local Jt. Exec. Bd. Culinary/Bartender Tr. Fund v. Las Vegas Sands,*
 17 *Inc.* 244 F.3d 1152, 1162 (9th Cir. 2001). As discussed above in detail, Plaintiffs cannot meet this
 18 requirement because individual inquiries pervade each of their claims: from time spent working “off
 19 the clock,” to time spent on “administrative” or non-repair tasks or waiting for vehicles, to whether
 20 they each suffered an injury as a result of an inaccurate wage statement.

21 B. Plaintiffs' Reliance On Improper Sampling Demonstrates That A Class Action Is Not
 22 The Superior Method For Adjudicating This Claim.

23 “Last, but certainly not least, the district court must find that a class action is superior to
 24 other methods of adjudication.” *Valentino v. Carter-Wallace, Inc., supra*, 97 F.3d 1227, 1234.
 25 Pursuant to Rule 23(b)(3), certification is appropriate only if the Court finds “that a class action is
 26 superior to other available methods for fairly and efficiently adjudicating the controversy.” Fed. R.
 27 Civ. Proc. 23(b)(3). Specific factors that the court may consider when determining whether class
 28

1 certification is superior include: (A) the class members' interests in individually controlling the
 2 prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the
 3 controversy already begun by or against class members; (C) the desirability or undesirability of
 4 concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in
 5 managing a class action. *Id.*

6 The fourth consideration should persuade the Court that class treatment is not a superior means
 7 of adjudicating Plaintiffs' claims. A class action addressing the varied individual factual issues raised
 8 by Plaintiffs is likely to be unmanageable. Even where there is a common nucleus of fact regarding a
 9 defendant's conduct, “[i]f each class member has to litigate numerous and substantial separate issues to
 10 establish his or her right to recover individually, a class action is not ‘superior.’” *Zinser v. Accufix*
 11 *Research Inst., Inc.*, 253 F.3d 1180, 1192 (9th Cir. 2001). While Plaintiffs did not propound any class
 12 discovery during the pendency of this action, utilizing the class records in *Juarez* they estimate the
 13 class is likely close to 170 potential class members. Cert. at 13:17-20. These class members are spread
 14 among four locations throughout Northern California. Even more problematic is that Plaintiffs have
 15 asserted 8 separate and distinct claims, based on no fewer than a dozen statutes and wage orders. Most
 16 putative class members are only eligible for some of the potential claims; none are eligible for all. To
 17 adjudicate all claims and determine which putative class members would be eligible for which claims
 18 is a logistical nightmare. Some have asserted claims in the past and are prohibited from getting a
 19 second adjudication. Without a viable method of common proof for liability evaluating the numerous
 20 claims, the Court will be mired in countless “mini-trials” regarding the understanding of the respective
 21 policies, practices and expectations of each corporate defendant and the applicability of each to the
 22 individual class members. The difficulties in managing such a wide-ranging factual inquiry should
 23 persuade the Court that class treatment is not a superior method for resolution.

24
 25 1. Sampling Is Not Appropriate, and the Inadmissible Attorney Declarations
Offer No Proposal for Management of the Class Action.

26 The declaration of Plaintiffs' attorney Stan Mallison unequivocally states that
 27 Plaintiffs seek to rely on a “research model’ approach to wage and hour class action litigation.”

1 Mallison Dec. ¶5. While he contends that the “success of this model [has been] exemplified” in
 2 approximately eighteen cases he has been involved in (Mallison Dec., ¶6) he omits that they pre-date
 3 *Duran v. U.S. Bank Nat'l Assn*, 203 Cal.App.4th 212 (2012), *rhg denied*, 2012 Cal. App. LEXIS 265
 4 (Cal. App. 1st Dist. Mar. 6, 2012) and that at least 12 of the cases were resolved prior to a motion for
 5 class certification being filed. Long Dec. ¶36-40. Mr. Mallison’s testimony is inadmissible. Fed. R.
 6 Evid. §402 [“Irrelevant evidence is not admissible”]; 2-402 Weinstein’s Federal Evidence § 402.02
 7 [“The rule … ensure[s] that nothing is received into evidence that is not logically probative of some
 8 matter to be proved”].¹⁰ The fact that Plaintiffs’ counsel seeks to employ a “research model” is
 9 significant because the court in *Duran* found that it was reversible error by the trial court to “resort[] to
 10 an unproven statistical sampling method[] … that (improperly) denied [defendant] the right to properly
 11 defend the claims against it.” *Duran*, *supra*, 203 Cal.App.4th at p. 275.

12 2. Plaintiffs Make No Proposals about Managing the Numerous Issues.

13 Apart from vague assertions that there are “no inherent difficulties in managing
 14 this case,” Plaintiffs offer the Court no real guidance on how to effectively manage the trial of this case
 15 as a class action given the number of individual inquiries and number of claims at issue. The
 16 California Supreme Court has confirmed that a plaintiff has the burden to prove that trial on a class
 17 basis would be manageable, and that “counsel’s assurances of manageability” are insufficient to
 18 sustain that burden. *Wash. Mut. Bank v. Superior Court*, 24 Cal.4th 906, 924 (2001); *Hernandez v.*
 19 *Chipotle Mexican Grill*, 189 Cal. App. 4th 751, 766 (2010) (“It is not sufficient … simply to mention a
 20 procedural tool; the party seeking class certification must explain how the procedure will effectively
 21 manage the issues in question....” citing *Dunbar v. Albertson’s Inc.*, 141 Cal. App. 4th 1422, 1432
 22 (2006). Here, there are substantial individual issues relating to both liability and damages which
 23 require an individual analysis of each employee, his shop records, his piece rate records, and his
 24 payroll records, to confirm or deny the accuracy of the Plaintiffs’ claims. Plaintiffs have not borne
 25 their burden of showing manageability as a class action.

26 ¹⁰ Mr. Sutton’s declaration is equally inadmissible under FRE402. Further, while he claims that Exhibit A showing the
 27 names of employees who worked in 2009 and 2010 is a proper summary under FRE 1006, it actually doesn’t compile any
 28 data regarding the claims other than proposed putative class members, which is a guess, as there is no foundation laid on
 how the names were obtained or from what admissible source they relied upon.

1 **VII. THIS CLAIM IS NOT APPROPRIATE FOR FLSA §216(B) CONDITIONAL**
 2 **CERTIFICATION.**

3 Plaintiffs' motion fails to establish that this matter is appropriate for collective-action
 4 certification. Typically the initial burden to certify a collective action is lenient, but "not invisible."
 5 Here, however, the standard should be raised given that Plaintiffs have had all contact information for
 6 nearly all potential opt-ins since *Juarez*, and Defendants have produced a large volume of documents
 7 in that action and the instant case, has produced its witnesses for several rounds of deposition, provided
 8 substantial written discovery responses in both cases, and put on weeks of trial testimony. Little
 9 discovery remains for Plaintiffs.

10 A. Regardless Of The Standard, Plaintiff Has Not Shown Sufficient Evidence To
 11 Establish That There Are Other Employees Who Desire To Join The Lawsuit.

12 Before a conditional-certification motion may be granted, a named plaintiff (or plaintiffs) must
 13 proffer some evidence that other similarly situated individuals desire to opt in to the litigation. In the
 14 absence of such evidence, there would be no basis upon which the Court could conclude that the action
 15 was an "appropriate case" for collective-action treatment. As one court has stated, "[o]thers' interest in
 16 joining the litigation is relevant to whether or not to put a defendant employer to the expense and effort
 17 of notice to a conditionally certified class of claimants." *Simmons v. T-Mobile USA, Inc.*, No. H-06-
 18 1820, 2007 WL 210008, at *9 (S.D. Tex. Jan. 24, 2007). Simply put, a plaintiff must do more than
 19 show the mere existence of other similarly situated persons, because there is no guarantee that those
 20 persons will actually seek to join the lawsuit. *Parker v. Rowland Express, Inc.*, 492 F.Supp.2d 1159
 21 (D. Minn. June 25, 2007). Despite having the contact information for nearly all members of the
 22 proposed class members since *Juarez* and actively seeking interested parties, only 9 piece rate workers,
 23 including the named Plaintiffs, have actually filed opt-in consent forms (and only 5 of those remain
 24 after res judicata and voluntary withdrawal eliminates 4). Plaintiffs have not shown sufficient evidence
 25 of individuals interested in pursuing a statewide collective action that includes multiple locations and
 26 hundreds of piece rate workers.

1 B. Plaintiffs Have Not Shown That They Are “Similarly Situated” To Other Putative
 2 Class Members.

3 Even if Plaintiffs have sufficiently shown that other individuals desire to join the
 4 lawsuit, they still fail to satisfy even the preliminary burden of demonstrating that putative class
 5 members are similarly situated.¹¹ Conditional certification should be denied where “the action relates
 6 to specific circumstances personal to the plaintiff rather than any generally applicable policy or
 7 practice.” *Basco, supra*, 2004 WL 1497709, quoting *Burt v. Manville Sales Corp.*, 116 F.R.D. 276,
 8 277 (D. Colo. 1987). Plaintiffs are not similarly situated. Defendants maintained policies and
 9 undertook practices to ensure that employees were properly paid for hours worked. Plaintiffs have the
 10 burden of showing that they and others were improperly paid because of the policies. It is appropriate
 11 to deny conditional certification due to lack of evidence of a company-wide policy or practice
 12 requiring work without proper compensation. *Basco, supra*, 2004 WL 1497709 (E.D. La. 2004)
 13 (conditional certification denied where any violations appeared to be the result of decisions by
 14 individual managers within individual departments at individual stores).

15 C. A Collective Action Would Not Increase Judicial Efficiency.

16 As discussed herein, an individualized inquiry would be required to determine whether
 17 any of the named Plaintiffs actually worked overtime, whether the amounts he received satisfied the
 18 requirement that he was paid for every hour worked, whether he had to wait around for cars to work
 19 on, on which days and for how long, whether he engaged in “administrative” activities, on which days
 20 and for how long, and what is owed to him as a result. The same process would be required for each
 21 putative class member. There is no judicial economy in this, making a collective action inappropriate.

22 **VIII. CONCLUSION**

23 Based on (1) Plaintiffs’ failure to present admissible evidence to establish class certification is
 24 appropriate, (2) the predominance of unmanageable individual issues as to liability and damages, as
 25 well as (3) the availability of superior alternatives to a class action, Defendants respectfully requests
 26 that Rule 23 class certification be denied. In addition, based on the failure to assert sufficient interest of

27 ¹¹ Plaintiffs bear the burden of establishing that they are similarly situated to the proposed class. *Basco, supra*, 2004
 28 WL 1497709, at *5 (FLSA collective action was appropriate only if the plaintiff could show a “factual nexus which
 binds the named plaintiffs and the potential class members together as victims of a particular” policy or practice).

1 other similarly situated employees to join the lawsuit, Defendants respectfully requests that the motion
2 for collective action be denied.
